## Summary

**Front-End Developer** with hands-on experience in building scalable, high-performance web applications using **React.js**, **Next.js**, **JavaScript (ES6+)**, **TypeScript**, **Tailwind CSS**, **Redux**, **Zustand**, and **RESTful APIs**. Strong focus on clean architecture, component-driven development, API integrations, and performance optimization.

## Technical Skills

**Languages:** JavaScript, TypeScript, SQL, JSON, HTML, CSS

**Tools & IDE:** Visual Code, GitHub, Cursor, Jira, Postman

**Framework & Library:** React.js, Next.js, Node.js TailwindCSS, Redux, Zustand, Cypress, Jest, AJAX

**Database:** PostgreSQL, MySQL

**Concepts:** Responsive UI, RESTful API Integration, SPA Architecture, Code Splitting, Lazy Loading, State Management, DSA (350+ problems), OOPs

## Work Experience

### Xllent Corporate Services

Client: Hinge Health — Software Engineer

Bengaluru, Karnataka

June 2024 – October 2025

- Designed scalable front-end features using **React.js**, **Redux Toolkit**, and **ES6+**, reducing data loading time by 30%.
- Optimized UI performance using **code-splitting**, **memoization**, and **reusable component** patterns while ensuring **responsive** and accessible layouts.

### Hinge Health

Software Engineer Intern

Bengaluru, Karnataka

Jan 2024 – June 2024

- Developed modular frontend features with **TypeScript** and React.js while improving API-driven workflows using **async/await** and **state management**.
- Worked on **RESTful API integrations**, enhancing data-fetching consistency with **debouncing** and **structured component architecture**.
- Assisted in improving authentication and request handling using **ES6+**, **Babel**, and secure API patterns.

## Projects

### User Service — Typescript, Node, PostgreSQL

- Built a centralized user-service enabling unified user data access across microservices with secure **JWT/Basic Auth** support.
- Designed **15+ RESTful API** endpoints using modular service architecture and efficient SQL query patterns.

### Care-Hub — React.js, Next.js, Zustand, Tailwind CSS

- Rebuilt the Care-Hub platform using **Next.js** with **SSR**, **SSG**, and **ISR** strategies along with optimized rendering, **lazy loading**, and **code-splitting**, improving load time by 40%.
- Integrated GraphQL and REST APIs to enhance data-access efficiency, supporting **10,000+ daily transactions** through fetch patterns, caching, and incremental updates.
- Developed scalable UI components with **Tailwind CSS** and used **Zustand** for lightweight global state, combined with **virtual scrolling**, **memoization**, and bundle-size optimizations to boost runtime performance.

## Education

### Tezpur University

Masters of Computer Applications

2022 - 2024

- CGPA: **8.73 / 10.0**

### T.M.B. University

Bachelors of Computer Applications

2018 - 2021

- Percentage: **75.54% / 100.0%**
- Passing Year: 2022 (late due to COVID-19)
