Technical Skills

Languages: JavaScript, TypeScript, SQL, JSON, HTML, CSS

Tools & IDE: Visual Studio Code, GitHub, Cursor, Jira, Postman

Framework & Library: React.js, Next.js, Node.js, Tailwind CSS, Redux, Zustand, Cypress, Jest, AJAX

Database: PostgreSQL, MySQL

Concepts: Responsive UI, RESTful API Integration, SPA Architecture, Code Splitting, Lazy Loading, State Management, DSA (350+ problems), OOPs

Work Experience

Xllent Corporate Services

Bengaluru, Karnataka

Client: Hinge Health — Software Engineer

June 2024 – October 2025

- Developed and delivered high-performance frontend features using **React.js**, **Redux Toolkit** and **Zustand**, improving data-loading time by 30% and increasing user engagement across web & mobile views.
- Created **20+ reusable UI components** following component-driven and scalable architecture, enabling faster development cycles, improved maintainability, and smoother collaboration with backend/API teams.
- Optimized application performance using **code-splitting**, **memoization** and **lazy loading** resulting in 25% faster rendering speeds and reduced Time-to-Interactive (TTI) across multiple devices.
- Collaborated with backend team to improve API workflows through **debouncing**, **caching**, and controlled fetch patterns, reducing redundant calls by 35%.

Hinge Health

Bengaluru, Karnataka

Software Engineer Intern

Jan 2024 – June 2024

- Designed modular frontend features using **TypeScript** & **React** with clean state-management patterns, reducing rendering delays and improving UI responsiveness by 22%.
- Worked on **RESTful API integrations**, enhancing data-fetching consistency with **debouncing** and **structured component architecture**.
- Improved authentication and request handling using **ES6+**, **Babel**, and **secured API patterns**, resulting in 40% faster response handling.

Projects

User Service — Typescript, Node.js, Nest.js, PostgreSQL

- Built a **centralized** and production-ready microservice architecture for managing user data, supporting 5+ cross-functional internal services with secure JWT & Basic Auth protection.
- Designed and deployed **15+ RESTful API** endpoints using modular service architecture, optimized SQL query patterns, and standardized error-handling for efficient data retrieval.
- Implemented **scalable modular service architecture**, enhancing performance and enabling 30% faster onboarding of new microservices and feature releases across the platform.

Care-Hub — React.js, Next.js, Zustand, Tailwind CSS

- Rebuilt the Care-Hub platform using **Next.js** with **SSR**, **SSG**, and **ISR** strategies along with controlled rendering, **lazy loading**, and **code-splitting**, improving load time by 40%.
- Integrated GraphQL and REST APIs to enhance data access efficiency, supporting **10,000+ daily transactions** through fetch patterns, caching, and incremental updates.
- Integrated **Tailwind CSS** and **Zustand** to develop 7+ scalable UI components, reducing average component load time by 20% and standardizing frontend design patterns across the application.

Education

Tezpur University

2022 - 2024

Masters of Computer Applications

- CGPA: **8.73 / 10.0**

T.M.B. University

2018 - 2021

Bachelors of Computer Applications

- Percentage: **75.54% / 100.0%**
- Passing Year: 2022 (late due to COVID-19)
